

INFORMATIVE, INNOVATIVE, RELEVANT!

Trade fair for electronic, digital and building technology

Trade fair for electronic, digital and building technology, belektro has been inspiring electronics sector professionals in the whole capital city region for 40 years! In 2024, it is expanding its range of offers!

OVERVIEW

Gross area (m ²)	24,200
Net area (m ²)	10,743
Total number of exhibitors	224
of which from abroad	13
Countries of international exhibitors	9
Sector representatives	14,036
of which specialist visitors	96.6%
Participation: hall/row stand 2024 (per m ²)	164 €
Recurrence	every 2 years
Dates	5–7 Nov 2024

(Reference year: 2022 including SmartHK)

MEETING POINT FOR SECTOR PROFESSIONALS

belektro 2024 is the capital city region event for professionals from all sectors who work in the planning and technical fitting of buildings:

- Electronics and sanitation, heating and air-conditioning trades
- Building technicians
- Electronics and sanitation, heating and air-conditioning wholesalers
- Technical building equipment planners
- Architects
- Project developers
- Engineers
- Housing industry
- Lighting planners and technicians
- Energy consultants
- Building contractors
- Specialist trainees

www.belektro.de

THE belektro

- Further development with efficient solutions for the energy transition in buildings
- Expansion of the portfolio to include building technology
- Net segments: heating, air-conditioning and sanitation
- The full range of networked building technology, inter-trade, in every hall
- Realise the energy transition in the building together using smart solutions!
- Realising the energy transition in the building using smart solutions and inter-sector networking
- Special topics in 2024: fire safety, PV and energy storage

EXHIBITORS FROM ALL THE KEY SECTORS

Companies which carry out technical fittings and modernisations of buildings using their solutions are coming to belektro 2024:

- Lighting technology and systems
- Services / education and further training / EDP
- Electrical installations and building system technology
- Reception aerials and broadband distribution technology
- Energy management
- Hazard alerting, security and surveillance systems
- Heating technology
- Air-conditioning and ventilation technology
- Measuring and test devices, measuring technology
- Sanitation system technology
- Systems for renewable energy generation and management
- Tools and operating equipment

UNIQUE ADVANTAGES

- Experience the latest innovations and order them right away
- Get to know smart technology in electronics, lighting PV, heating, air-conditioning and sanitation
- Take the opportunity for further training – also from the Chamber of Architects, Berlin Construction Industry Chamber and Berlin-Brandenburg electronics trades
- Meet points of contact in person – expand your personal network
- Use shortcuts through the integrative hall plan
- Experience live networking. All four halls present the full range of electronic, digital and building technology

FRAMEWORK PROGRAMME

	Occupational safety seminars for apprentices in electronics
	Architects' Forum
	de-Forum
	ep-Forum
	Workshop Street
	Heating topic day and sanitation topic day in the building technology forum
